

bitgrip

realizing digital visions

QA- & Test-Manager Software

Join the fantastic bitgrip team.

bitgrip develops digital visions and transforms them into smart products. We support customers from all industries in product and software development as well as in project management. We're looking for YOU to strengthen the quality of our software development.

Your tasks and profile

- You support the software development as an integrated part of the team
- You define quality standards and implement them across all projects
- You create test concepts, catalogs and cases in collaboration with all stakeholders
- You delegate and review the test implementation in an agile environment (Scrum)
- You have a university degree with a technical focus (computer science, business informatics or similar)
- You have 5+ years of experience in test automation and test management
- You communicate fluently in German & English
- You enjoy working with nice colleagues

This is in your toolbox

- Test management for Jira Cloud
- Cucumber
- Selenium
- K6
- Unix, Linux
- Jenkins Pipelines
- Bash Script
- NPM, Maven
- CoreMedia CMS

Your benefits

- friendly, relaxed and trustful team spirit
- Job ticket or Job bicycle
- attractive salary
- flexible work time and home office
- individual educational opportunities
- high-end hardware
- regular team events
- drinks, fruits and sweets 4free
- team brunch on Friday
- fancy and convenient located office on Ku'damm

Want to join us?

Then we look forward to your application to work@bitgrip.de - including your possible starting date and your salary expectations.

About bitgrip

We are committed to long-term cooperation. A relaxed, uncomplicated atmosphere is just as important to us as the exchange of experience and the constant expansion of our knowledge.

We deliberately avoid the customary project hopping. Our growing international team consists of seasoned professionals with an average experience of more than ten years.
